Why is my course progress wrong?

FAQ · https://training.fairhousinginstitute.com/docs/completion-percentage/

In order for you to have the best learning experience, your course has been designed in SCORM. Our Basics course operates as two modules. So it will only show 100% when the course is completed, and you have passed your exam. It shows 50% when you have completed lesson one. It shows 0% when the course hasn't yet been started.

For all our other courses, your progress will only show as completed once the course is complete and the exam is passed.
